

Senior Environmental Analyst Job Specification.

About TE Laboratories Ltd (TelLab)

Based in Tullow Co. Carlow, TelLab is a wholly owned Irish company established in 1991, with multi-divisional activities ranging from environmental analysis, oil and fuel testing laboratories, manufacture of chemical reagents and standards, as well as proactive R&D and NPD departments. Operating with customers and partners on a global basis, TelLab are a progressive company with plans to improve all aspects of our operations, allied with ambitions to expand our current product/service offerings through a pipeline of innovation coming from our new product development (NPD) teams.

Operating to INAB accredited ISO 17025 in our Environmental Laboratory, TelLab delivers a professional service in all aspects of environmental analysis, whilst within our Oil Analysis Division, we are Irelands only accredited oil analysis Laboratory. Our flexibility provides a strategic advantage in allowing us to provide customized solutions to our customers across the full range of activities.

Overview

This is a key role within our Environmental Laboratory, and the successful candidate will be task focussed and will continually strive to preform their duties to a high standard of quality and accuracy while ensuring that deadlines are achieved successfully. Ideally the successful candidate will demonstrate a proven track record in Method Development and validation.

The key requirements are:

- High level of technical expertise and capable of producing highly precise and accurate work
- Achieves goals efficiently and consistently
- Ensure the activities of the laboratory conform to the relevant QMS standards of ISO 17025 and ISO 9001
- Training existing and new lab technicians on the correct use, calibration and troubleshooting of lab equipment
- Provide customer support on technical aspects of services/products provided to the market
- Play a supportive role to the environmental team to ensure goals such as utilising Lean, and related, principles are achieved
- Ability to lead by example

Qualifications:

Education/Training:

- Educated to degree level or higher, ideally B.Sc. Chemistry.
- The post holder will have previous laboratory experience.

The Ideal Candidate will possess:

- Strong working knowledge of INAB accreditation, and ability to translate the quality standard requirements into operations as required.
- Experience in operation and troubleshooting of HPLC, IC, ICP-MS, AA, GC, GCMS, and Spectrophotometer is a distinct advantage.
- Excellent communication skills with ability to communicate at all levels within the organisation.
- Ability to work independently and make decisions based on judgements and integrity.
- Proven analytical skills.
- Excellent organisational and time management skills.
